

Sanampreet Singh

DevOps Engineer

Budapest, Hungary | sanampreet0900@gmail.com | +36 706438791

EDUCATION:

OBUDA UNIVERISTY BUDAPEST

2018-2022

Bachelor of Computer Science Engineering

SKILLS:

- CI/CD: Jenkins, GitLab CI/CD
- Containers & Orchestration: Docker, Kubernetes, Helm
- GitOps & SCM: ArgoCD, Git
- Configuration Management & IaC: Ansible
- Monitoring: Grafana, Zabbix, Splunk
- Scripting: Python, Bash, Groovy
- Security: HashiCorp Vault, secrets management
- OS: Linux (Ubuntu, CentOS)

INTERESTS

- Automation & DevOps
- Cloud & Infrastructure
- Artificial Intelligence & Machine Learning
- Platform engineering
- Cloud-native technologies

ACHIEVEMENTS

StipendiumHungaricum Scholar Awarded by Hungarian Government.(07/2017 - 07/2022)

LANGUAGE:

- English
- Hindi
- Hungarian A2

SUMMARY:

DevOps Engineer with 4+ years of experience in automation, CI/CD, and system reliability. Skilled in Jenkins, Kubernetes, ArgoCD, and scripting (Python, Bash), with a strong focus on workflow automation and scalable deployments. Proven impact in reducing manual effort by 90% and accelerating provisioning by 70%. Experienced in SAP and cloud environments, with a track record of improving delivery efficiency and system stability through DevOps best practices.

EXPERIENCE:

DEVOPS ENGINEER 2025- PRESENT
SAP

- Automated SAP Payroll system provisioning from VM build to OnStockReady.
- Contributed to a MaxDB to S/4HANA migration project by automating provisioning and operational workflows
- Created scalable automation pipelines with Jenkins, Python, Bash, and Selenium, reducing manual work.
- Provisioned ~153 customer landscapes (360 systems) within 2 months through automated workflows
- Achieved a 90% reduction in manual effort for SAP and ABAP tasks.
- Increased system provisioning speed by 70%, enhancing delivery and productivity.
- Collaborated with teams to improve release efficiency and stability

DEVOPS ENGINEER 2022- 2025
SAP

- Managed and ensured the reliability of the "Success Factor" cloud application.
- Spearheaded the design, implementation, and optimization of CI/CD pipelines using Git, Jenkins, and Kubernetes.
- Achieved a 50% reduction in deployment time and enhanced overall development efficiency.
- Maintained version control systems like Git or SVN for seamless collaboration among developers and engineers during project lifecycles.
- Orchestrated ArgoCD for efficient app deployment following GitOps practices.
- Automated rollbacks and recovery procedures to safeguard against faulty releases and maintain system integrity.
- Collaborated closely with development and operations teams to improve continuous delivery processes.
